- * write a program which creates two threads, one thread displaying 'BMS College of Engineering' once every ten & another displaying 'CSE' every 2 sec.

class displaymessage implements Runnable?

String Message;
int Interval;

displaymessage(String message, int Interval) {
 this.Message = Message;
 this.Interval = Interval;
}

Public void run() {
 while (true) {
 System.out.println(Message);
 try {
 Thread.sleep(Interval * 1000);
 }
 catch (InterruptedException e) {
 System.out.println(e);
 }
 }
}

Public class multithread {
 Public static void main (String args[]) {
 Thread T1 = new Thread (new displaymessage("BMSCE", 10));
 Thread T2 = new Thread (new displaymessage("CSE", 2));
 }

T1. start(1);

T2. start(1);
